Subject: Resolution Recognizing the Seriousness of Polycystic Ovary Syndrome

Dear Chairman Burgess and Ranking Member Green,

On behalf of the undersigned organizations committed to the health and improved quality of life for women and girls with polycystic ovary syndrome (PCOS), we are writing to bring to your attention, and ask for your support of **H.Res.495**, the resolution designating September as PCOS Awareness Month and recognizing the seriousness of the disorder. This resolution will help to bring critical nationwide attention to PCOS, one of the most common human disorders and the most common endocrine (hormone) disorder in women. PCOS is a genetic, reproductive, hormonal and metabolic disorder that affects an estimated five to 10 million women and girls in the U.S. and more than 10 percent worldwide. PCOS has become one of the most pervasive and underserved public health issues that threatens the mental and physical health, and quality of life of girls, women and their families. The disorder can lead to obesity and the most common causes of death in women including type 2 diabetes, cardiovascular disease and cancer.

One of the most heartbreaking challenges of PCOS is its effect on fertility and family building. PCOS is the most common cause of female infertility. PCOS in pregnancy increases the risk of complications such as gestational diabetes, preeclampsia, miscarriage, and fetal and infant death. Researchers have also found that women with PCOS are twice as likely to be hospitalized than other women, most frequently due to infertility and cardiometabolic issues associated with PCOS.

More than 50 percent of women and girls with PCOS are going undiagnosed, putting them at even greater risk for deadly illnesses which can be prevented or delayed with proper diagnosis, treatment and care. This resolution seeks to call attention to the need for improved public awareness, education and increased research, to help with advancements in the field and improved outcomes for women and girls with polycystic ovary syndrome.

We ask for your support of this resolution. If we can provide any assistance in this effort, please contact Sasha Ottey, Executive Director of PCOS Challenge: The National Polycystic Ovary Syndrome Association at [info@pcoschallenge.org](mailto:info@pcoschallenge.org) or (404) 855-7244, or Martha Cramer in Congressman David Scott's office at [martha.cramer@mail.house.gov](mailto:martha.cramer@mail.house.gov) or (202) 225-2939.
